

SCAN COIN CDS 810 Cash Deposit System

The picture shows a CDS 810 with optional motorised card reader and customer keypad.

This revolutionary compact unit brings self-service benefits within reach for small banks and other businesses with limited-volume coin flows. It is the first time a CDS has been aimed at this market segment and it extends the scope of self-service into new applications.

New cash deposit applications

Many banks have already discovered the benefits of Cash Deposit Systems (CDS). These solutions open the way to self-service around-the-clock. They create new opportunities for smart cash processing logistics, improve customer service and release bank staff from manual cash handling for a more profitable consulting role. Up to now, the CDS concept has been most suitable for banks and retail stores with a relatively high-volume coin flow. However, with the introduction of CDS 810, SCAN COIN makes self-service solutions profitable in the limited coin volume segment for the first time.

Designed for limited-volume coin flows

SCAN COIN has developed a revolutionary compact unit with full CDS capability that offers a performance/cost ratio designed for the needs

The interface is easy to use – customers just deposit their coins and press the start-button. All functions are very user-friendly. As the CDS 810 is a lightweight unit with a small footprint, it is easy to place and install. You can choose a lobby installation, either on a table, on a pillar or wall-mounted.

With CDS 810, manual coin handling by staff is finally over. The bank gets an affordable, reliable self-service system offering a quick return on investment.

TECHNICAL SPECIFICATIONS

WIDTH	580 mm / 22.8"
